for Healthcare

DataInsightsSM THE POWER OF THE REPORTS IS IN THE PLATFORM.

Leveraging our deep-domain expertise in hospital supply chain data, DataPros' innovative DataInsightsSM analytics-driven decision support offering revolutionizes the way supply chain executives manage their departments and their vendor relationships.

A unique combination of proprietary multidimensional database and sophisticated analytics, and advanced customizable reporting, DataInsightsSM offers the visibility that supply chain executives need to respond to the increasingly urgent need to improve efficiencies and reduce costs in any hospital's supply costs.

MORE THAN JUST REPORTING

- As an independent, we offer a comprehensive and impartial view into any or all of your data.
- Our hands-on approach and data expertise allow us to implement your analytics needs.
- We offer a cost-effective solution allowing unlimited users with permission-driven views at no additional cost.
- It's your choice: your data can live on your side or, with the interface, in the DataPros cloud, or both.
