DataPros Enables Implementation of GS1 Standards in Healthcare

Tampa, Fla. (July 13, 2009) – DataPros for Healthcare, an active member of GS1 Healthcare US, is driving the adoption of GS1 data standards in the healthcare industry by helping healthcare organizations prepare for use of the Global Data Synchronization Network® (GDSN®). The Tampa-based firm is contributing its experience to the development of an industry roadmap for the GDSN that will serve as an adoption model for stakeholders in the healthcare supply chain.

DataPros is assisting in the documentation of early experiences and lessons learned in order to provide the industry with real-world use cases and benefits. “As a leading independent provider of data integration services in the healthcare industry, DataPros for Healthcare is well positioned to support this effort,” said Daniel Wilkinson, vice president of business development for GS1 US.

Global data standards for healthcare will improve patient safety and supply chain efficiency, traceability and accurate data synchronization among hospitals and healthcare systems across the United States.

“We are excited to be working with GS1 Healthcare US on such an important initiative in the healthcare industry,” said Allen Esses, president of DataPros for Healthcare. “As a leading provider of data integration solutions and champions of data integrity, we embrace these standards and believe our expertise is a valuable asset for the future use of the Global Data Synchronization Network in healthcare.”
